

Remarks

The Amendments to the specification update the "Cross-Reference To Related Applications," correct an inapt word at page 3, and revise the text of the section titled "Incorporated Reference Documents." The latter amendment recognizes that a patent issued on this application would not include a copy of SAE Standard J560 as an attachment to the patent.

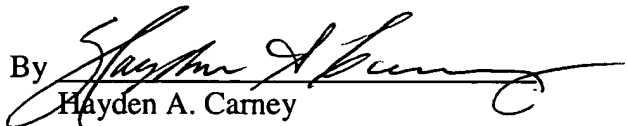

A copy of SAE Standard J560 (Rev. July 1998) is an attachment to the concurrently filed Information Disclosure Statement.

The claim amendments delete redundant words (claim 10) and revise a claim dependency (claim 18). The claim amendments do not affect the substance of any claim, nor do they affect the fee payable upon filing of this National Stage application.

Inasmuch as the substance of these claims 1-28 were determined by the Office to be allowable in the context of International Application No. PCT/US03/13984 (see the International Preliminary Examination Report in the file of this National Stage application), claims 1-28 are allowable as now presented.

Respectfully submitted,

CHRISTIE, PARKER & HALE, LLP
